**Philips Parallel printer interface VU 0040**

For Philips VG 8000 and other MSX home computers.

This cartridge can be used in either cartridge slot. It is recommended however that you use the one in the rear which leaves the front slot free for other cartridges.

Insert cartridge with label facing you.

In the rear of the cartridge you will find a socket for your printer cable.

Insert this cartridge only when your MSX home computer is switched off.
